inlingua Metro New York prides itself on the long-term, collaborative relationships we have built with our clients and the thousands of individual success stories we have written together.

At inlingua Metro New York, we are committed to being flexible and customer-oriented, while maintaining high levels of professional and ethical standards. We are also creative in our ability to design unique strategies to meet the varying needs of local and international organizations.

Why are we unique?

- We have the strength of a global organization and its proprietary materials and provide customer-oriented services with the knowledge of the NYC and NJ market and its needs.
- Our native-fluency instructors are not hired until they successfully complete a rigorous, comprehensive pass/fail training program.

inlingua Metro New York Language Schools

New York and New Jersey's experts in language and cultural solutions

Mission

The mission of inlingua Metro New York is to provide the most effective language services for clients with professional, educational, business and/or social needs to communicate across language barriers. These services consist of cost-effective language and intercultural training and translation and interpretation services, all specifically tailored to our clients' needs.

inlingua Metro New York draws from the resources of inlingua International, one of the most successful language and cultural training organizations in the world – with over 40 years of experience and 320 language schools worldwide.

The inlingua Method

No More False Starts or Unsuccessful Attempts

Have you tried to learn a language before?

Was it an unpleasant process where you memorized vocabulary and grammatical rules such as how to conjugate verbs?

When you finally got a chance to speak the language, was it hard to say more than a few words or string together a sentence?

If this sounds like your experience (or you avoided learning a language altogether) –

You Are Not Alone!

Many people who come to inlingua have had unsuccessful attempts at learning a language in the past due to outmoded, “tried and true” language learning techniques. That’s why we developed the unique inlingua method to help you learn a new language – quickly, painlessly, and successfully.

A Dynamic and Practical Approach

The proven inlingua method uses a dynamic and practical approach to learning a language – an approach that focuses on the functional aspects of a language, not the dry, technical details. Rather than memorizing long lists of vocabulary words or reverting to word-for-word translation, you will gain skills in practical, real-world situations and be personally coached on accuracy, fluency, and pronunciation.

Our method encourages you to have fun and experiment with the language, so that you can figure out its patterns for yourself and progress quickly in your proficiency. We also make sure that speaking, listening, writing, and reading skills are integrated into our technique so that you end up with a natural, organic feel for the language as a whole. And, unlike self-teaching tools, our live instructors include all the subtle but critical nuances such as culture, etiquette, and appropriateness in every lesson plan.

Our Proprietary Materials Make a Huge Difference

All of inlingua’s proprietary materials are created and developed at our Pedagogical Services Center in Bern, Switzerland. They are unique and regularly updated, and undergo a rigorous development process, including piloting at inlingua centers prior to publication. Your materials will include a textbook, workbook, verb book, and audio CDs. There is a progress test every five units, and your instructor will receive a Trainer Resource Pack that includes lesson planning guidelines, communicative activities, and additional training resources.

inlingua Translation Services for Business

inlingua Translation Service prides itself on three important premises:

Quality translations executed by professional language translators who have specific expertise in a wide variety of industries

The commitment and capability to carry out on-time delivery

Excellent customer service

Languages

inlingua has extensive expertise in all forms of language translation. The languages we translate range from the romance languages to the more diversified and remote languages.

Adapting to the culture (Localization)

inlingua Translation Service has an excellent reputation for language translations that capture the culture and localization of the particular language and material, as well as the vocabulary and syntax. Our clients request our services time after time because of the end product that we deliver and the feedback that they receive.

inlingua translators

All of our language translators are native speakers of the target language into which they are translating. inlingua's network of translators range from translators of general subject matter such as basic legal documents, correspondence, and personal documents, to translators highly specialized in the nomenclature of specific industries and fields. Additionally, we employ translators who are editors for documents such as press releases, advertising copy, and brochures that require an additional creative style so that the document can preserve the flavor of the product in translation. This avoids "literal translations" which do not capture the meaning the client wants to express.

Don't get burned by machine translations or translations farmed out abroad.

Machine translations do not capture the messages and nuances of the language and in many cases convey inaccurate and potentially dangerous translation, especially when dealing with medical and legal subject matter. Translators who are not in the United States and Canada may not have a firm grasp of the English language, which can impact translations and make them literal and without context.
